

What is the Difference Between ISP and VNO License?

In this article i will share the differences between ISP and VNO License in complete detail..

What is ISP license?

- ISP license is needed for running Internet services or Data services in India.
- You can provide internet services like Leased Line/Broadband /VOIP /IP TV etc.
- It is mandatory for Company to have UL ISP for providing ISP services for a certain area.
- Issuing Authority – Department of Telecommunication Delhi.
- The Government of India has allowed Private Sector's Company to apply for Internet Service Provider (ISP) License to start their own ISP Business.
- This license is commonly known as Unified License (UL). Private Sector Company's can apply for ISP license for different areas under Unified License.
- Validity for this license is 20 years.

What is VNO License?

- VNO license is needed for running Internet services or Data services in India.
- You can provide internet services like Leased Line/Broadband /VOIP /IP TV etc.
- VNO is affordable, less complicated, convenient and ideal for small level ISPs.
- Issuing Authority – Department of Telecommunication Delhi.

- A Virtual Network Operator is an internet service reseller extending high-quality network and management services to other networking companies that do not possess their own telecom setup.
- A VNO (Virtual Network Operator) License is a miniature version of an ISP license. • Validity for this license is 10 years

Difference between ISP & VNO License

- With an ISP license, you can run internet services on a larger domain.
- ISPs who wish to operate small level internet service only in a particular territory can choose a VNO license instead of an ISP license.

Who can get ISP License?

To apply an ISP license in India, you need a registered company under the Companies Act, 2013.

Registration SEVA can also help you in getting the Company registered. Company can be a Private Limited Company or Public Limited Company. It's mandatory that in MOA it should mention Internet Service Provider (ISP) as a service.

Who can get a VNO License?

To get the approval of VNO ISP license you should be a company registered under Companies Act `ie your company should be private limited and in MOA it should be mentioned that you can act as Internet Service Provider(ISP) as a service`

Types of ISP License
